

Senior Frontend Developer – Angular (m/w/d)

Description

We are building a **central communication interface** for a collaborative software platform that integrates multiple services and APIs. The system focuses on scalability, maintainability, and user experience. You'll join a skilled Agile team working with modern technologies and development practices.

Responsibilities

- Develop and maintain **responsive Angular components** using **TypeScript, RxJS, and Angular Material**
- Integrate **new frontend technologies and tools** into existing systems to improve performance and maintainability
- Collaborate closely with **UX/UI designers, backend developers, QA testers, and stakeholders** to deliver user-centric features
- Apply **UX/UI best practices** to create intuitive and responsive interfaces
- Participate in **Agile ceremonies** (daily stand-ups, sprint planning, reviews, retrospectives)

- **Mentor and support** other developers by sharing best practices and technical insights

Qualifications

- Proven experience as a **Frontend or Full-stack Developer** with a strong focus on **Angular (v16 or later)**
- Solid knowledge of **TypeScript, RxJS, and Angular Material**
- Solid understanding of **responsive design, accessibility, and cross-browser compatibility**
- Experience integrating **RESTful APIs** and backend services
- Familiarity with **version control systems** (Git/GitHub) and CI/CD workflows

Nice to Have

- Experience with **Docker and Jenkins** (CI/CD setup and maintenance)
- Familiarity with **Atlassian tools** (Jira, Confluence)
- Knowledge of **Identity & Access Management (IAM)** integrations
- Exposure to **performance optimization** and **code refactoring** practices
